

## **PUBLIC NOTICE**

### **IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER**

#### **MONITORING REQUIREMENT NOT MET FOR ANGEL FIRE SERVICES – VILLAGE OF ANGEL FIRE WATER**

Our water system recently violated a drinking water standard. Although this is not an emergency, as our customers, you have a right to know what happened, what you should do, and what we are doing.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During January 2015, we did not complete all monitoring requirements for Total Coliform and therefore cannot be sure of the quality of our drinking water during that time.

#### **What should you do?**

There is nothing you need to do at this time.

#### **What does this mean?**

Our water system is required by law to collect a monthly total coliform sample. During this reporting period, we did not collect the required sample.

#### **What happened? What is being done?**

During the month of January 2015 we are required to collect seven total coliform samples and only six were collected from the water system.

The following month seven samples were collected and sent to the lab for analysis.

Date that system collected next valid routine sample: February 3, 2015

(Note: A system will not return to compliance until a lab has analyzed a routine sample).

For more information, please contact Amos Torres at 575-377-1674 or PO Box 610 Angel Fire, NM 87710.

Please share this information with all other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
