

Rescue is a broad category. It demands that although we always hope for the best, we prepare for the worst. Simply put, it is what we do to get people out of a bad situation. It includes high and low angle rope rescues, swift water, confined spaces, entrapments, snow entrapments and any other less than desirable situations that can occur. The most common rescue we perform at Angel Fire Fire Department is the Motor Vehicle Accident (MVA). Most MVA rescues are able to be performed by our responders without the need for tools, but when occupants are trapped or entangled, Angel Fire Fire Department is able to access them with our extrication equipment, commonly referred to as the 'Jaws of Life'. This equipment is capable of dismantling a vehicle from around entrapped victims. We ask that you help keep all of our rescue equipment for training purposes only and be safe!
